

The Freyssinet Group

SUSTAINABLE TECHNOLOGY

For 70 years The Freyssinet Group has championed innovation in specialized civil engineering with leading technology in ground improvement, earth retention and structures.

Today, we continue to deliver sustainable design-build solutions for transportation, public infrastructure, commercial and industrial sites, and marine and airport structures.

The depth of our expertise is strengthened through an international network in 50 countries and the backing of VINCI, a world leader in construction and civil engineering.
